

**KENTUCKY HIGHER EDUCATION INSTITUTIONS  
DEGREE COMPLETION DATA  
ANALYSIS OF PROGRAM PERFORMANCE**

The following data are provided to give a concise picture of the array and distribution of academic programs and the academic degree performance of Kentucky higher education's public community colleges and universities. The data are presented in two sets. Set 1 reports data on the number of degrees conferred for all academic programs at all levels at all public institutions. Set 2 concentrates on academic degree program performance.

**Set 1**

In Set 1, the data are reported for two academic years, 1991/92 and 1995/96. The green sheets present summary information by program level (associate, bachelor's, certificate, master's, specialist, doctoral, and first professional) and by type of institution. The summary data reflect that 314 programs, 27.5 percent of the 1,142 programs currently offered at all degree levels, experienced a decline in the number of graduates between 1991/92 and 1995/96. A total of 65 associate degree programs (32.9 percent of the 197 programs currently offered) and 195 bachelor's degree programs (36.3 percent of the 537 programs currently offered) declined over the five-year period. It should be noted that enrollment in higher education began to level off and decline in this decade. University enrollment peaked at 111,238 in 1992 and has declined to 105,664 currently. UK Community College enrollment peaked at 48,370 in 1993 and is 43,674 currently. It is possible that degrees conferred data may be impacted somewhat by declining enrollments, especially in the 1995/96 reporting period.

Set 1 also provides comprehensive information about the number of institutions which offer each program at each degree level. At the baccalaureate level, the data in Set 1 are presented separately for nucleus and non-nucleus programs. Nucleus programs are those programs such as English, history, biology, psychology, etc. that are considered basic to the broad educational mission of a university. Even though courses in these fields are taken to meet general education requirements, the programs may not award a significant number of degrees. This level of detail provides the opportunity to analyze whether declines by discipline are across the board or are concentrated in select institutions. An institutional profile also is discernible.

**Set 2**

Set 2 takes the analysis a step further and concentrates on program performance. For the purpose of this report, low performance in undergraduate programs (associate, bachelor's, and certificate) is defined as fewer than ten degrees awarded in 1995-96. Low performance for graduate programs (master's, specialist, doctoral, and first professional) is defined as fewer than five degrees conferred in 1995-96. The analysis covers the same time period as Set 1 with the addition of a five-year average column. It is important to note that this column is derived from an average of the five years, not from the first and fifth year.

The yellow summary sheet presents a comprehensive picture of program performance by degree level and by type of institution. The systemwide totals indicate that 540 of 1,142 programs (47%) are low performance programs. At the universities, almost half of all programs at all degree levels are low performance programs. The comparable statistic in the UK Community College System is almost 40 percent. Low performance programs offered by the universities range from a low of 34 percent to 75 percent. Similarly, low performance programs at individual UK Community Colleges range from a low of 14 percent to 60 percent. Almost half of the academic programs in the system are bachelor's programs and 45 percent of them are low performance programs. Set 2 includes institutional specific and program specific performance data so that more in-depth analysis can be undertaken.

**Data Source:**

The degrees conferred data are reported annually to the Council on Higher Education's data base by the institutions according to the guidelines established by the systemwide data committee. Institutional representatives have not had an opportunity to review this presentation.
